

This rider is a practical advance guide for a 3IG 3EN DJ performance. Please confirm the final equipment, set time, access and production contact in writing. Reasonable professional substitutions are welcome when agreed in advance.

1. PERFORMANCE ADVANCE

- Confirm venue, event date, set time, set length, arrival time, access route and soundcheck or line-check time.
- Provide the production manager or sound engineer's mobile number before the event.
- Notify the artist in advance of any recording, broadcast, livestream or sponsor obligations.

2. DJ EQUIPMENT

- Professional club-standard DJ system in excellent working order.
- Minimum three compatible media players with Rekordbox USB support; four preferred where available.
- Pioneer DJM-series mixer or an agreed professional equivalent, with all channels, cue functions and effects tested.
- All firmware, digital links, audio cables and network connections must be checked before artist arrival.

3. MONITORING AND FRONT OF HOUSE

- Clear, high-output booth monitoring with independent level control and no audible delay.
- Balanced stereo feed to a suitably powered PA, operated by a competent sound engineer.
- System gain structure must provide clean headroom without clipping, distortion or aggressive limiting.

4. STAGE, POWER AND ACCESS

- Stable, level DJ booth at comfortable standing height with adequate working space and safe cable management.
- Clean protected mains power for all artist and DJ equipment.
- Secure access from arrival to stage, plus a safe place for USB media, headphones and personal items.

5. VISUALS AND BRAND

- 3IG 3EN logo and approved visual assets are available on request for venue screens and event promotion.
- Do not alter the logo, combine it with another mark or publish unapproved artwork without written approval.
- Where screens are available, confirm resolution, aspect ratio and delivery deadline during advance.

6. HOSPITALITY AND TRAVEL

- Provide bottled still water at the booth and a secure artist or production area.
- Confirm parking, loading access, guest allocation and any accommodation or travel arrangements in advance.
